RHEEM IS AUSTRALIA'S FAVOURITE NAME IN HOT WATER AND THE NAME AUSTRALIANS HAVE TRUSTED FOR GENERATIONS

YOU'LL BE RIGHT WITH RHEEM

No.1 with Australian families. Rheem is Australia's favourite hot water system... and it's been that way since 1939, when Rheem started making water heaters in Australia. Generations of Australian families have relied on Rheem for water that comes on steady, hot and strong!

RHEEM IS EVERYWHERE

There is an unequalled network of experienced Rheem service agents across the country. No matter where you are in Australia there is expert advice available to ensure that you get the Rheem solution that is right for you.

WE HAVE THE RIGHT RHEEM FOR YOU

Rheem has the most extensive range of hot water systems available in Australia. Solar, gas or electric storage. Continuous flow or heat pump. Energy efficient and stainless steel options. Rheem has a range of capacities to suit your requirements and your budget.

Solar, gas or electric.
Continuous flow, heat pump
or storage. Rheem has a
range of hot water solutions
for every situation.

CHOOSING THE RIGHT CAPACITY RHEEM FOR YOUR HOME

Many households change over time, so it's important to choose the right capacity to meet your needs both now and as your family grows.

Factors to consider in determining your hot water needs:

- Number of bathrooms or people using hot water at the same time.
- Adults and children in the home (teenagers will use more hot water than young children).
- Dishwashers or washing machines connected to hot water outlets, that may use hot water at the same time.
- Will a large bathtub or spa-bath be used regularly?
- Space available to install a water heater
- Available energy supplies - gas or electricity

Your hot water system needs will be influenced by the water conditions, climate and water pressure in your region, as well as the available energy supply (gas or electricity) and space available at your home.

RHEEM ELECTRIC STORAGE HOT WATER

MAINS PRESSURE HOT WATER

Rheem electric storage water heaters store hot water in the tank ready for immediate use. These products rely on an electric element(s), which is controlled by a thermostat, to heat water.

Larger model Rheem electric water heaters are ideal for use with low cost off-peak electricity, and are available in a range of capacities to suit most needs.

The mains pressure advantage ensures full pressure to multiple outlets all at the same time.

Electric storage systems
are a relatively inexpensive
and reliable solution to
your hot water needs.

WHY RHEEM ELECTRIC STORAGE?

Designed for Australia's tough conditions, using over 75 years of experience manufacturing in Australia.

Includes models suitable for connection to economical 'off peak', 'time of use' or continuous electricity tariffs.

Sizes to suit every family and hot water requirement from 25L to 400L.

Mains Pressure water delivery for steady, hot and strong hot water.

Indoor or outdoor use (excludes plug-in models)

Full technical support and spare parts available through Rheem's National Service Network.

7 or 10 year cylinder warranty models available.^{1,2,3}

All Rheem electric water heaters are made in a wholly owned and operated Rheem facility.

OFF-PEAK OR CONTINUOUS ELECTRICITY?

Off-peak tariffs offer lower cost electricity that is only available during specific times, typically during the night or outside peak usage periods. These tariffs normally reserved for larger water heater models that provide enough stored hot water for daily use. Generally, two types of off peak tariffs are available.

8 Hour night rate – 250L - 400L (lowest rate available) and
16 hour 'extended' rate – 160L - 400L

'Time of Use' (TOU) tariffs provide power to the water heater 24 hours per day, but different rates apply at different times of day i.e. rates are higher for using electricity during peak hours, and less for electricity used during the 'Shoulder period' and overnight. Water heaters connected to TOU tariff should use a timer ensuring operation during the lowest cost heating periods.

Continuous tariff electricity makes power available to heat the water 24 hours per day. A smaller tank can often be used on this tariff but the running costs will be higher. The price is typically a flat rate.

Compare various water heater running costs online at www.rheem.com.au/RunningCostCalculator or speak to your energy retailer for tariff details.

Model Number:
4A1 Series

RHEEM STELLAR® ELECTRIC STAINLESS STEEL

- Available in 50L - 315L models
- Up to 24% better than MEPS⁴ reducing energy use, saving you money
- Stainless steel cylinder & water fittings
- Up to 42% lighter⁵ for easier handling and installation
- No anode - saves on maintenance costs
- Mains pressure
- Manufactured in Australia
- 10 year cylinder warranty³

Model Number:
491 Series

NEW RHEEM 491/492 SERIES

- Available in 250L - 400L models
- Easy retrofit - identical footprint & plumbing connections to previous series models
- Dual handed fittings
- Suit lower cost tariffs
- Commercial grade enamel
- Thicker sacrificial anodes
- Twin element models available
- Manufactured in Australia
- 10 year cylinder warranty²

Model Number:
191 Series

RHEEM 191/192 SERIES[†]

- Available in 25L, 50L, 80L, 125L & 160L capacities
- Dual handed fittings[†]
- Front oriented fittings for easier access
- 25L & 50L models are the smallest in their class
- 7 year cylinder warranty¹

[†]25L (111025) models have left hand connections only.

Model Number:
121 Series

RHEEMPLUS® ELECTRIC

- 50°C pre-tempered model
- Adjustable valve to deliver 50°C at the tap.
- Available in 125L, 160L, 250L & 315L capacities
- Complies with the tempering requirement of AS/NZS 3500.4
- Left hand connection
- Manufactured in Australia
- 7 year cylinder warranty¹

RHEEM COMPACT 45L

- The Most Compact available in the over-40L capacity range
- Just 670mm HIGH (including anode cap)
- Smallest Diameter on the market – 400mm
- 47L Delivery^{**}
- Dual Handed – easier to install
- Recessed Plug Fittings
- 7 year cylinder warranty¹

^{**} Rated hot water delivery is 40L in accordance with AS/NZS4692.1. Actual delivery is 47L when tested to AS/NZS4692.1.

Model Number:
191045

RHEEM GAS STORAGE HOT WATER

MAINS PRESSURE HOT WATER WHEN YOU NEED IT

Mains pressure gas storage water heaters deliver hot water instantly, as they keep a generous quantity stored hot and ready for your use. As they are at mains pressure, you can be sure of a strong flow of hot water, and the ability to service multiple showers or hot water needs at once. A choice of 4 and 5 Star models, in a range of capacities means there is a model for every budget and family. And should you ever run short, Rheem's high recovery models will have you back in hot water fast.

WHY RHEEM GAS STORAGE?

5 Star energy rating models save you money.

Designed for Australia's tough conditions, using 70 years of experience in Australia.

5, 7 or 10 year cylinder warranty models available.^{8, 9, 10.}

Capacities to suit most family sizes and hot water requirement, starting from 90 Litres.

Fast hot water recovery of up to 200 Litres per hour available.⁶

High recovery Rheem Stellar models for high-demand installations.

Mains pressure water delivery for steady, hot and strong hot water.

Indoor models also available.

The ability to service multiple uses at once without losing hot water pressure.

Full technical support through Rheem's National Service Network.

Some models available in natural gas or propane

FACTORS TO CONSIDER:

Purchase, Installation and Running costs:

- Gas Storage systems are a relatively inexpensive solution to your hot water needs. There is a Rheem model to suit just about every budget. If replacing an existing gas unit, there is probably a Rheem model which can simply be installed in the same space.
- Higher efficiency Gas Storage water heaters cost less to run. As a guide, every extra energy-rating star represents approx 7% less gas usage, which means savings in energy bills.

Capacity:

- Gas Storage water heaters are rated by their storage capacity and also their "recovery rate". This is the quantity that can be fully reheated in one hour; the higher this rate the faster you can be back in hot water.

RHEEM STELLAR®

- 5 Star energy efficiency
- High recovery 200L/hour of hot water⁶
- Mains pressure to many taps at once
- 330L or 360L first hour capacity of hot water⁶
- Modern design to complement any home
- Manufactured in Australia
- 10 year cylinder warranty¹⁰

Model Number:
350 Series

RHEEM 5 STAR

- 5 Star energy efficiency
- Mains pressure to multiple taps
- Strong recovery
- 275L or 305L first hour capacity of hot water⁶
- Manufactured in Australia
- 7 year cylinder warranty⁹

RHEEMPLUS®

- 50°C temperature limited models
- No tempering valve required¹¹
- Adjustable to deliver 50°C at the first outlet (complying with AS 3498)

Model Number:
347 Series

RHEEM 4 STAR

- 90L, 135L and 170L capacities
- 4 Star energy efficiency
- Mains pressure
- Hi-temp thermostat, so you need less hot water^{††}
- Manufactured in Australia
- 7 year cylinder warranty⁹

††Based on the most common temperature 43°C shower through a 9 litre/minute showerhead mixing with cold water at 10°C Rheem 4 star 347 Series with thermostat set at 73°C delivers 15-20% more continual shower time than the Rheem 3 Star 311 Series with thermostat set at 65°C.

Model Number:
300 Series

RHEEM INDOOR

- 135L and 170L capacities
- Mains pressure
- Manufactured in Australia
- 5 year cylinder warranty⁸

RHEEM CONTINUOUS FLOW GAS HOT WATER

CONTINUOUS HOT WATER WHEN YOU NEED IT

Continuous Flow gas water heaters deliver hot water that will never run out because they heat water when you need it, for as long as you need it. Continuous Flow water heaters work differently from storage water heaters, only heating on demand rather than heating and storing water until needed. Mounted to the wall and taking up less space, they are ideal for a compact home site or apartment.

6 Star energy efficient
Rheem Continuous Flow
for hot water that never
runs out.

CHOOSING THE RIGHT CAPACITY RHEEM FOR YOUR HOME

Your Rheem will be serving you for many years so it's important to choose the right capacity to meet your needs both now and as your family grows.

Factors to consider in determining your hot water needs:

- Number of bathrooms or people using hot water at once.
- Adults and children in the home (teenagers will use more hot water than young children).
- Dishwashers or washing machines connected, that use hot water at the same time.
- Will a large bathtub or spa-tub be filled using hot water?
- Your needs may also depend on the climate and water pressure. The following guide can assist you in selecting the right Rheem Continuous Flow model for your home.

Model	Rheem 12	Rheem 16	Rheem 20	Rheem 24	Rheem 27
Hot Water Flow Rate (at 25°C Temp Rise) ¹¹	12L/Min	16L/Min	20L/Min	24L/Min	27L/Min
No. of Bathrooms Moderate Climate	1	1.5	2.2	2.5	3
Cool Climate	1	1	1.5	2	2.5

WHY RHEEM CONTINUOUS FLOW?

Sizes to suit every home, apartment or family – 12L, 16L, 20L, 24L and 27L/minute capacities.¹³

6 Star energy rating to save money and the environment.

Designed for Australia's tough conditions, combining international expertise with over 70 years of experience in Australia.

10 year heat exchanger warranty.¹⁵

Flamesafe® overhear protection, which automatically shuts down your heater should it overheat.

Rheem EZ LINK® delivers up to 54L/minute by linking 2 Rheem units to act as one, thereby doubling capacity.¹³

Rheem Q Factor™ for rapid hot water every time, without the fluctuation when multiple taps demand hot water, which can occur with some Continuous Flow units.

Family safety with electronic control for accurate and reliable water temperature, reducing the risk of scalding.

Electronic Remote Temperature Controllers for accurate setting of the ideal and safest temperature.

Solar ready Rheem 70°C capable models are compatible with solar systems without the need for special fittings.¹⁶

Factory pre-set 50°C models available, requiring no tempering valve.¹⁴

Full technical support through Rheem's National Service Network.

Compact size for flexibility in design to suit every installation.

Available to suit either Natural Gas or Propane

Internal 27L model available, with matched flue system.

WITH RHEEM YOU'RE IN CONTROL

Rheem delivers added safety by putting you in control of the hot water in your home.

Rheem Standard and Deluxe Electronic Temperature Controllers are optional on all models, allowing you to choose the exact temperature you need and to guard against scalding. Rheem Bathroom Controllers can be set up to 50°C. Deluxe Controllers also offer a "bath fill" mode, to turn off the water flow once the bath is filled.

Model Number:
874627

DESIGNED TO DISAPPEAR

Your Rheem Continuous Flow water heater can be neatly hidden away to save even more space:

Pipe covers in matching colour will conceal pipework.

Recess boxes will set your Rheem into the wall.

RHEEM SOLAR HOT WATER

SOLAR THAT SAVES

WHY RHEEM SOLAR

Energy efficient – can save up to 65% to 70% of water heating energy consumption.¹⁷

Reduces carbon emissions – solar systems can save up to 2.0 to 2.9 tonnes of greenhouse gas emissions every year.²⁰

Minimise reliance on fossil fuels and protect yourself against future energy cost increases – take advantage of Australia's abundant supply of sunlight, and reduce your reliance on expensive, non-renewable gas and electricity.²¹

Complete range – the Rheem solar range includes both split, ground mounted systems and complete roof mounted models in a variety of capacities from 160 – 410 litres.

All weather protection – Rheem Premier® Loline series feature unique, drain-back heat exchange technology, that prevents the solar system from freezing, or overheating during weather extremes.

Booster options – Rheem solar systems are available with electric or gas boosting, providing hot water during cloudy or rainy weather.

Eligible for financial benefits – A STCs financial benefit is available for installing solar water heating.²²

Visit www.rheem.com.au/rebates to find out how many STCs apply to Rheem solar water heaters by zone and to download the Rheem STC Assignment form.

HOW SOLAR WORKS

Solar water heaters work by absorbing energy from the sun's rays in the roof mounted solar collectors and transferring this to heat water stored in the tank. Ground mounted direct systems rely on an inbuilt circulator to push the water through the system, whereas roof mounted systems rely on a natural 'thermosiphon' effect. Water passes through the solar collector where it is heated, then moves out of the collector and into the tank. The tank gradually gets hotter until the water reaches its maximum stored temperature. Indirect systems use a special heating fluid, rather than water to absorb heat from the collectors. The heat is transferred to the water in the tank via a heat exchanger.

GROUND MOUNTED SYSTEMS

Model Number:
591270/2SP

PREMIER LOLINE (Electric boosted)

- Indirect design with complete frost protection - ideal for even the coldest of climates.
- Features drain-back heat exchange technology, to maximise solar gain and protect against weather extremes
- Electric boost
- The split design reduces the structural load on your roof.

Model Number:
596270/2SP

PREMIER LOLINE (Gas boosted)

- Indirect design with complete frost protection - ideal for even the coldest of climates.
- Integrated or remote continuous flow gas booster provides backup during periods of low or no solar gain.
- The split design reduces the structural load on your roof.

Model Number:
511325/2NPT

LOLINE

- The multi-riser solar collectors efficiently absorb energy from the sun.
- Economical to purchase.
- Automatic, electronic controls maximise solar gain.
- Suitable with NPT or LCS collector

ROOF MOUNTED SYSTEMS

Model Number:
52H300/2SP

PREMIER HILINE

- Features an indirect heat exchange design, providing reliable operation in any climate.
- Lightweight and durable stainless steel tank cylinder (52H Series).
- Space saving roof mounted installation.
- Suitable for use in areas subject to freezing conditions.
- Suitable for use with a wide range of water chemistries (52C Series)

Model Number:
52S300/2NPT

HILINE®

- Ideally suited to warmer climates.
- Does not require pumps and controllers.
- Relies on water moving through the solar collectors and into the tank using energy absorbed from the sun.

SMALL-SCALE TECHNOLOGY CERTIFICATES

Small-scale Technology Certificates (STCs) provide a financial benefit to encourage the installation of solar water heaters provided under a Federal Government legislated scheme. STCs are available for eligible solar water heater installations.

One STC is equivalent to a megawatt hour (MWh) of electricity displaced by an eligible system, over a ten year period.

To find out more about eligibility criteria visit www.rheem.com.au/rebates

RHEEM HEAT PUMP HOT WATER

NEXT GENERATION SOLAR

Traditionally solar water heaters have proven themselves to be an energy efficient renewable water heating alternative to gas and electric systems. And while solar systems continue to be an efficient way to heat water, new heat pump water heating technology saves equivalent amounts of energy and green house gas emissions to electric boosted solar systems.

Works day and night,
as they don't rely on
daylight to operate.

WHY RHEEM HEAT PUMP?

Energy efficient – cuts energy use and greenhouse gas emissions by up to 61%.²⁵

No solar collectors – reduces structural load on your roof, and can be used where roof collectors aren't suitable.

Replacement for electric water heaters – uses the same plumbing and electrical connections as an electric water heater, making it an ideal upgrade from a standard electric water heater.

2 piece design – results in a reduced handling weight, making it easy to deliver and install on site.

Back up element fitted in every model – delivers hot water even on the coldest of winter nights.

Eligible for incentives – Rheem Heat Pumps are eligible to receive Small-scale Technology Certificates (STCs).²⁶

When suitable, product can be connected to lower cost tariffs – which helps to further reduce running costs.^{23, 27}

5 year cylinder warranty & 2 years on the sealed system.²⁴

HOW A HEAT PUMP WORKS

Rheem Heat Pumps deliver hot water by efficiently utilising a free and abundant source of energy – the heat that is in the air around us. Refrigerant vapour compression technology enables the heat pump to intensify this heat, which is used to produce hot water. Rheem Heat Pumps are more efficient during warmer months, and will operate for less hours during the day than in colder months of the year. See illustration below.

When power is available, the Heat Pump heating cycle will continue until the tank is full of hot water.

THE RIGHT RHEEM FOR YOU

NEW &
IMPROVED

Model Number:
551325

MPI-Series II

- Ideal upgrade for an electric storage water heater, featuring common plumbing and electrical connections.
- Can connect to economical extended off-peak tariffs for maximum savings on running costs.
- Whisper technology enables quieter operation.
- Heat Pump module is located well below the fence line, which keeps noise away from windows.
- Two piece interconnecting design allows for easy one-man installation.
- Suitable for warm and tropical climates. Not available in Tasmania.
- Available in RheemPlus® 50°C temperature models.

Model Number:
551310

HDi-310

- Heavy duty model
- Top Down Heating delivers 60°C hot water, fast.
- High heating power means fast recovery to provide all the hot water you'll need.
- Interconnecting design fits onto a standard outdoor electric water heater footprint.
- Suitable for cold climates.
Please note Rheem does not recommend installation in Zone 5.
- LEDs to indicate operating status

SMALL-SCALE TECHNOLOGY CERTIFICATES

Small-scale Technology Certificates (STCs) provide a financial benefit to encourage the installation of solar and heat pump water heaters through a Federal Government legislated scheme.

This map shows the climate Zones within Australia which will define the number of STCs allocated to an eligible solar and heat pump water heater.

As of the 1st of November 2012, Zone 5 was added to the list of Zones eligible to create STC's for an eligible Air Sourced Heat Pump. Visit www.cleanenergyregulator.gov.au/ret for a list of postcodes by Zone, including zone 5.

To claim your STC entitlement, simply complete the STC Assignment form and attach the necessary documentation. Visit www.rheem.com.au/rebates to find out how many STCs apply to Rheem Solar Water Heaters and Heat Pumps by zone and to download the Rheem STC Assignment form.

Warranty and conditions

1. Warranty: 7 year cylinder warranty, 3 year labour warranty on the cylinder, 1 year parts and labour warranty on all other components for domestic (non-commercial) installations. 7 year warranty applies to product manufactured after 1/1/2012. Conditions apply, see the Rheem warranty set out in the product's Owner's Guide or view it at www.rheem.com.au/warranty
2. Warranty: 10 year cylinder warranty, 3 year labour warranty on the cylinder, 1 year parts and labour warranty on all other components for domestic (non-commercial) installations. Conditions apply, see the Rheem warranty set out in the product's Owner's Guide or view it at www.rheem.com.au/warranty
3. Warranty: 10 year cylinder warranty, 1 year labour warranty on the cylinder, 1 year parts and labour warranty on all other components for domestic (non-commercial) installations. Conditions apply, see the Rheem warranty set out in the product's Owner's Guide or view it at www.rheem.com.au/warranty
4. Performance varies by model. Refer to the Specification table for individual model performance.
5. Up to 42% lighter than comparable Rheem vitreous enamel water heater models of the same capacity.

GLOSSARY OF TERMS

Recovery rate – the volume of water a heater can reheat in one hour. Measured as the volume of completely cold water (should the water heater be run completely out) that can be heated to 45°C over the cold water temperature.

First Hour Capacity – a measure of water heater capacity that combines both the stored hot water volume & the hourly recovery rate (eg: if a water heater has storage capacity of 130L and a recovery rate of 200L/hour, its First Hour Capacity is 330L).

Warranty and conditions

- Based on 45°C temperature rise.
- Guide only. Based on a cold water temperature of 15°C.
- Warranty: 5 year cylinder warranty, 3 year labour on cylinder, 1 year parts and labour warranty on all other components for domestic (non-commercial) installations. Conditions apply, see the Rheem warranty set out in the product's Owner's Guide or view it at www.rheem.com.au/warranty
- Warranty: 7 year cylinder warranty, 3 year labour on cylinder, 1 year parts and labour on all other components for domestic (non-commercial) installations. Conditions apply, see the Rheem warranty set out in the product's Owner's Guide or view it at www.rheem.com.au/warranty
- Warranty: 10 year cylinder and SuperFlue warranty, 5 year labour on cylinder and SuperFlue, 1 year parts and labour warranty on all other components for domestic (non-commercial) installations. Conditions apply, see the Rheem warranty set out in the product's Owner's Guide or view it at www.rheem.com.au/warranty
- Some applications require a tempering valve in accordance with AS/NZS 3500:4
- These models are not available in propane.

GLOSSARY OF TERMS

Flamesafe® – a Rheem safety protection feature that automatically shuts down the continuous flow water heater should a fault develop.

Q Factor™ – a Rheem feature that keeps the heater in readiness so hot water delivery is as fast as possible, and at consistent temperature.

Warranty and conditions

- Guide only, subject to ambient water temperature and pressure, correct pipe sizing and appliance flow rates.
- 4.50°C factory pre-set models supply hot water at a maximum 50°C at all outlets in accordance with AS3498. Some applications may require tempering, refer to AS 3500:4. 60°C models must have a tempering valve installed in accordance with AS 3500:4.

- Warranty: 10 Years parts and 3 Years labour on Heat Exchanger, 3 Years parts & labour on other components, when installed in a domestic dwelling. For all other installations, the warranty period is 1 Year parts and labour on Heat Exchanger and other components. Conditions apply, see the Rheem warranty set out in the product's Owner's Guide or view it at www.rheem.com.au/warranty

- Applies to 70°C capable models when set to 70°C

Warranty and conditions

- Energy savings of up to 65% to 70% based on Australian Government Approved TRNSYS simulation modelling of a Rheem Loline with 2xNPT200 collectors and using a medium load in Zone 3 and apply when replacing an electric water heater.
- Warranty: Rheem Premier® Loline/Loline/Hiline/Premier Hiline® (52C Model) 5 year supply on cylinder and solar collectors, 3 year labour on cylinder, 1 year labour on collectors, 1 year parts and labour. Applies to a single-family domestic dwelling installation only. Conditions apply, see the Rheem warranty set out in the product's Owners Guide or view it at www.rheem.com.au/warranty
- Warranty: Rheem Premier® Hiline (52H Models) 7 year supply on cylinder, 5 year supply on solar collectors, 3 year labour on cylinder, 1 year labour on collectors, 1 year parts including labour. Applies to a single-family domestic dwelling installation only. Conditions apply, see the Rheem warranty set out in the product's Owners Guide or view it at www.rheem.com.au/warranty
- Greenhouse gas emission savings based upon installing a Rheem Loline Solar Hot Water heater with 2xNPT200 collectors in Zone 3, when replacing an electric water heater.
- Any financial savings will vary depending upon type of Rheem Solar system installed, orientation and inclination of the solar collectors, type of water heater being replaced, hot water consumption and fuel tariff. Maximum financial savings off your hot water bill are achievable when replacing an electric water heater on continuous tariff.
- Eligibility criteria apply. STC Incentive/benefit scheme is subject to change without notice.

Warranty and conditions

23. The impact on an electricity account will depend on the tariff arrangement of the water heater being replaced and where you live. These Rheem Heat Pump water heaters (model dependant) are recommended for connection to either 24 hour continuous tariff or extended off peak (min 16 hours/day). Before purchase consult your energy provider for more information on cost comparisons.
24. Warranty: 5 year supply on cylinder, 3 year labour on cylinder, 2 year supply on sealed system including labour, 1 year supply on all other parts including labour. Applies to a single family domestic dwelling installation only. Phone 131 031 for details. Conditions apply, see the Rheem warranty set out in the product's Owner's Guide or view it at www.rheem.com.au/warranty
25. Energy and greenhouse gas emissions reduction of up to 64% based on Australian Government Approved TRNSYS simulation modelling and apply when replacing an electric water heater with a Rheem Heat Pump water heater in Zone 3.
26. Assumes consumer eligibility for rebates. Eligibility criteria apply. Rebates and incentive schemes are subject to change or cancellation without notice.
27. Any financial savings will vary depending upon type of Rheem Heat Pump installed, type of water heater being replaced, hot water consumption and fuel tariff. Maximum financial savings off your hot water bill are achievable when replacing an electric water heater on continuous tariff.
