STORAGE AND TRANSPORTATION

Stacking for transportation: 2 pallets max

Note: When double stacking pallets, ensure upper

pallet sits securely on edge protector.

Note: Pallets delivered stacked are not bound together.

PALLET STACKING

QUALITY

REC performs a quality check on all pallets before and during loading. Vehicles will only be loaded with REC panels if they are deemed safe and serviceable. During transportation, the pallets are stably loaded in protected containers with air bags between pallets to secure them in position. The freight company and driver are responsible for ensuring suitable load safety for each delivery vehicle. Vehicles without suitable load safety measures will not be loaded. REC makes every effort to ensure environmentally-friendly packaging materials are used.

MINIMUM FORK LENGTHS FOR TRANSPORTATION

| | | Single/Double stack only |
|----------|------------|---|
| Forklift | Longside | 1.2 m (47 in) Loading &unloading of container only |
| | Short side | 1.8 m (71 in) |
| Pallet | Longside | X |
| jack | Short side | 1.8 m (71 in) |

Note: Forks must be spaced a minimum of 500 mm apart Handlers must ensure that vehicles used for REC pallets can handle the specified load safely.

Note: Specifications subject to change without notice
